SEALPAC® MA-S

INNOVATIVE MAGAZINE DENESTERS

Our MA-S series of compact magazine denesters, available in two different capacities, requires no technical connections other than electrical power. Equipped with servo drive, they achieve an unparalleled denesting result. The MA-S denesters have been designed according to the latest standards in technology and hygiene. Due to their C-shape, each denester is easily integrated in new and existing lines.

Your benefits:

- Airless: except for electrical power, no other connections needed
- Fully electric: no exhaust air in the production area
- State-of-the-art: according to the latest standards in technology and hygiene
- C-shape: simple integration on our traysealers and easy to retrofit on existing lines
- Compact design: two models with different magazine capacities, also available in double lane execution
- Servo drive: endless flexibility in movements
- Easy access: owing to the central, ergonomically designed cover
- Remote access: allows for optimal servicing
- Hygienic: all mechanical parts are outside the dirt area, hence easy to maintain
- Low maintenance: no lubrication required

User-friendly operation:
