

## ECA 900

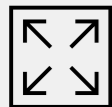

Whole muscle stuffer with automatic loader

# ECA 900

## Versatile and effective

The ECA 900 stuffer machine is the ideal solution for stuffing and compacting all types of meats into casings, nets, or collagen and net. Its main function is to introduce one or more whole muscle meats into these materials, resulting in a final product with a uniform shape, achieving a perfect presentation and higher yield in slicing.

 **We adapt to your needs.**  
Contact us

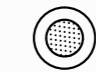

**Stuffing System**  
Specially designed to prevent casing breakage.

**Versatility**  
Great capacity to produce a wide variety of fresh, cured, and cooked products.

**Easy to Handle**  
Easy to handle and operate.

## Pujolàs Benefits

-  Efficiency without losses.
-  Maximizing yield for slicing.
-  High meat compaction for a more profitable product.

**Efficient**  
No losses thanks to the pressing pressure that elongates the product without fibres breakage.

**Hygienic Design**  
Electronic safety system to guarantee operator protection.

**Safeguards**  
Special key system to access the electro-pneumatic system.

## Optional accessories

**Automatic loader**  
Designed to streamline the loading of product into the stuffer.

**Provisions and Connections**  
Includes connectors, wiring, and electronic components necessary to facilitate the addition of a loading and/or unloading system in the future.

**LEPA 900 Version**  
With pressing system on the front part for greater compaction of products, specially designed for whole ham.

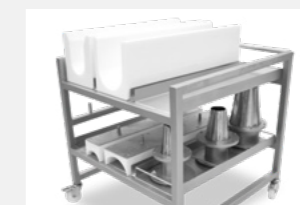

**XXL Version**  
Higher opening to facilitate the placement of extremely large products during the production of large meats.

**Conformer**  
Automatic system for wrapping the product with film and net.

**Additional Moulds**  
Different diameters according to the product type.

**Mould set Trolley**  
Designed to facilitate mould cleaning and mould storage.

**Mobile Option**  
Machine with wheels for easy movement.

# Performance and engagement for the food industry

With over 40 years of experience in the food industry sector, we have a strong track record of delivering **high-quality equipment**. Pujolàs designs, develops, and manufactures equipment for the production and processing of **food products**. We combine traditional techniques with the latest innovations to achieve high-quality results and significant added value. Efficiency and performance in every product are our commitment.

**PILOT PLANT**  
R & D Center

Working hand in hand with our customers.

## Want to assess the performance of your product?

At our Pilot Plant, our research and development center, you will find a showroom of our equipment. You can conduct tests and trials of the machinery and evaluate the development of your product.
