

Elevadores

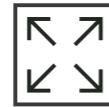

Tippers and lifters for all types of containers

PEH 2000-2

Column Lifters

The PEH series consists of **hydraulic column lifters** designed to raise and empty containers holding **juicy products** into hoppers at a specified discharge height.

We manufacture customized lifters tailored to your specific needs. Contact us for further information.

Standard Equipment Features

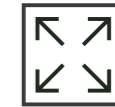

- ✓ **Lifting System**
Stainless steel hydraulic cylinders.
- ✓ **Capacity**
Lifting capacity of up to 1,500 kg.
- ✓ **Emptying**
Adjustable tilt angle to accommodate specific requirements.
- ✓ **Discharge**
Customizable discharge channel.
- ✓ **Discharge Height**
Adaptable according to your particular needs.
- ✓ **Control**
Electric push-button controls for container lifting and lowering.
- ✓ **Safety**
Safety bar system made from stainless steel.

ELE 700

Hydraulic Lifters

The ELE series is characterized by **hydraulic lifters** designed to elevate and empty **heavy containers** into hoppers, tables, injectors, maceration drums, and other equipment.

We manufacture customized lifters tailored to your specific needs. Contact us for further information.

Standard Equipment Features

- ✓ **Lifting System**
Stainless steel hydraulic cylinders.
- ✓ **Capacity**
Lifting capacity of up to 1,500 kg.
- ✓ **Emptying**
Adjustable tilt angle to accommodate specific needs.
- ✓ **Discharge**
Customizable discharge channel.
- ✓ **Discharge Height**
Adaptable according to specific requirements.
- ✓ **Control**
Electric push-button controls for lifting and lowering the container.
- ✓ **Safety**
Stainless steel safety bar system.

Available Options

- Electric safety barriers for access doors.
- Front or side container entry.
- Wheeled rail system designed for easy filling of multiple drums with the same lifter.
- Remote control with push-buttons for operating the lifter at a distance.
- Additional supports to lift cutter carts or other special containers with the same lifter.

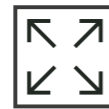

Available Options

- Electric safety barriers for access doors.
- Front or side container entry.
- Wheeled rail system for easily filling multiple drums with a single lifter.
- Lockable wheel system.
- Remote control with push-buttons for operating the lifter remotely.
- Additional supports to lift cutter carts or other special containers with the same lifter.

PE 2002 Container Lifter

The PE 2002 is designed to **facilitate product handling tasks**, primarily for **transferring loads** from one point to another, minimizing the need for operators to bend down to **pick up products** from the container. Its practical lifting system ensures **high efficiency and productivity** in any production setup. Operators will benefit from **easier and more efficient handling**.

We manufacture customized lifters tailored to your specific needs. Contact us for further information.

Standard Equipment Features

- ✓ **Lifting System**
Operated by pneumatic cylinders.
- ✓ **Tilting**
Maximum tilt angle of 80°.
- ✓ **Product Collection**
Pickup height of 920 mm.
- ✓ **Mobility**
Equipped with swivel wheels.
- ✓ **Ease of Use**
Operated via control buttons.
- ✓ **Safety**
Includes a safety warning tape to mark the working area.
- ✓ **Automatic Function**
The container automatically lifts as weight is removed.

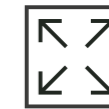

Available Options

- Pneumatic cylinders are made from stainless steel.
- Hydraulic lifting system for containers weighing up to 1,300 kg: Ref. PE 2002 / HID.
- Force multiplier for lifting containers up to 700 kg.
- Customizable product pickup height.
- Customizable discharge channel.
- Supports for lifting cutter carts or other specialized containers using the same lifter.

PE 2002-1 Container Lifter and Tipper

The PE 2002-1 stands out for its capability to efficiently **tip products** into tables, injectors, hoppers, or other similar containers. Its **practical lifting and tipping system** ensures **high performance and productivity** in any production environment.

We manufacture customized lifters tailored to your specific needs. Contact us for further information.

Standard Equipment Features

- ✓ **Lifting System**
Operated by pneumatic cylinders.
- ✓ **Control**
Container elevation is controlled by the operator using a push-button system.
- ✓ **Safety**
Includes safety warning tape to mark the working area.
- ✓ **Tilting**
Maximum tilt angle of 120°.
- ✓ **Product Collection**
Pickup height of 1,100 mm.
- ✓ **Ease of Use**
Operated via control buttons.
- ✓ **Mobility**
Equipped with swivel wheels.

Available Options

- Customizable tilt angle depending on the type of product.
- Hydraulic lifting system for containers weighing up to 1,300 kg: Ref. PE 2002-1 / HID.
- Pneumatic cylinders made from stainless steel.
- Force multiplier for lifting containers up to 700 kg.
- Customizable discharge height based on the destination location.
- Customizable discharge channel.
- Supports for lifting cutter carts or other specialized containers using the same lifter.

PEN 300

Biscuter-Type Container Lifters

The PEN 300 is specifically designed for **emptying cutter carts** into work tables, hoppers, and machines. Its efficient lifting mechanism ensures **high productivity** and **performance** during production.

Standard Equipment Features

- ✓ **Lifting System**
Utilizes pneumatic cylinders.
- ✓ **Emptying**
Maximum tilt angle of 120°.
- ✓ **Product Collection Height**
1,100 mm.
- ✓ **Mobility**
Swivel wheels for ease of movement.
- ✓ **Efficiency**
Operated via control buttons for smooth functioning.
- ✓ **Safety**
Safety warning tape to mark the operational area.
- ✓ **Control**
The operator controls container lifting via a push-button system.

Available Options

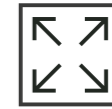

- Stainless steel cylinders.
- Customizable tilt angle based on product type.
- Custom discharge height tailored to the unloading area.
- Personalized discharge channel.

PTI 2000

Pallet Truck

The Pujolàs PTI **pallet truck** is fully constructed from stainless steel, including bearings, axles, chains, and all components. With a **lifting capacity of 2000 kg**, the PTI 2000 is perfect for **maneuvering in tight spaces** within the food industry.

We manufacture pallet trucks tailored to your specific needs. Contact us for more details.

Pallet Truck Models

PTI 2000 Standard

Fork Width: 520 mm
Fork Length: 1,120 mm

PTI 2000L (Longer Forks)

Fork Width: 520 mm
Fork Length: 1,250 mm

PTI 2000E (For Larger Containers)

Fork Width: 700 mm
Fork Length: 1,250 mm

AISI 304
STAINLESS STEEL

Performance and engagement for the food industry

Since 1985, we have been innovating to deliver results that replicate the artisanal process while maintaining quality and increasing profits.

PILOT PLANT
R & D Center

Working hand in hand with our customers.

Want to assess the performance of your product?

At our Pilot Plant, our research and development center, you will find a showroom of our equipment. You can conduct tests and trials of the machinery and evaluate the development of your product.
