

# VCP 400

Automatic box dumping system

# VCP 400

## Automatic and effective

The box dumper is an efficient and robust piece of equipment, designed for the easy and safe emptying of various types of boxes and/or containers. It is capable of accommodating different dimensions and types of boxes, making it suitable for multiple applications. Ideal for use in food processing, manufacturing, agriculture, and recycling industries, the box dumper improves operational efficiency and workplace safety.

## Pujolàs Benefits

Automatic efficiency of box dumping.

Increases productive capacity.

Minimizes effort and increases operator safety.

### Safety features

Equipped with locks and safety barriers to protect operators during the dumping process.

### Durable construction

Made from high-quality, heavy-duty materials to withstand rigorous use and ensure longevity.

### Adjustable dumping angles

Features adjustable angles to control the flow of contents, providing precision and preventing spills.

### Efficiency

Increases workflow efficiency by significantly reducing the time and effort needed to empty boxes manually.

### Low maintenance

Designed to require minimal maintenance, ensuring consistent performance, and reducing downtime.

### Ease of operation

Simple control mechanisms for smooth and safe operation, reducing the risk of injury and increasing productivity.

# Performance and engagement for the food industry

With over 40 years of experience in the food industry sector, we have a strong track record of delivering **high-quality equipment**. Pujolàs designs, develops, and manufactures equipment for the production and processing of **food products**. We combine traditional techniques with the latest innovations to achieve high-quality results and significant added value. Efficiency and performance in every product are our commitment.

**PILOT PLANT**  
R & D Center

Working hand in hand with our customers.

## Want to assess the performance of your product?

At our Pilot Plant, our research and development center, you will find a showroom of our equipment. You can conduct tests and trials of the machinery and evaluate the development of your product.
